

SCAN IT AFRICA (PTY) LIMITED was founded in 2001 and currently operates from a secure Business Park situated in Kempton Park.

Our Bureau has been involved with various large profile Projects which have been successfully completed. A few of our customers include Transnet / Momentum / Sasol / Eskom.

Scan IT Africa is totally committed and prides itself on delivering accurate and excellent quality of work and constantly ensures the highest standards of business ethics, responsibility and environmental sustainability.

Our Scanning Bureau offers a fully comprehensive document management system, allowing information to be scanned / converted to electronic format allowing easy retrieval to your desktop, for viewing and printing.

We have developed and written our own processing software, after long and in-depth studies of several software packages on the market, so as to bring to you the best processing software, which is versatile and accommodates your line of business as opposed to you having to change your systems to accommodate an imaging system.

Our strength lies in the survey that we would undertake to understand the customer's requirements and its document flow, so that we can utilize the versatility of our system to design and create an imaging system that would best reach the objectives and the requirements that the customer wants to achieve.
